Profile Summary

Software engineer and final-year student in software engineering with practical web development skills gained from side projects. competent in writing excellent code, working well in teams, and handling full-stack development. knowledgeable about current web technologies, committed to lifelong learning, and able to adjust to new problems in the field of software development.

Skills

- **Front-End :** HTML, CSS, JavaScript, Typescript, ReactJS, Bootstrap, SCSS, Tailwind CSS, Redux
- **Back-End :** NodeJS, ExpressJS, Java, PHP, Postman
- **Database :** SQL, MySQL, MongoDB, MongoDB Atlas,
- **Other skills :** RESTful APIs, Git, GitHub, NPM, OOP's concepts, Database Design Responsive Web Design, Dynamic Design

Experience

Web Developer Intern | Exposys Data Labs   July 2024-July 2024

- During my internship, I have acquired several novel proficiencies. I'm using my existing knowledge of the MERN Stack to practice using it as I construct the "ShopEx" e-commerce web application.
- This project helped me get practical experience in designing scalable, dependable online apps and efficiently managing front-end and back-end operations, which enhanced my full-stack programming skills.

Education

Government Engineering College   Gandhinagar, Gujarat

Bachelor of Engineering | CGPA : 8.50   September 2022 - Pursuing

Dr. S & SS Gandhy College of Engineering & Technology   Surat, Gujarat

Diploma Engineering | CGPA : 8.34   August 2019 – July 2022

Projects

MERN JWT Authentication   Link

- Developed a secure authentication system using the MERN stack.
- Implemented JSON Web Tokens (JWT) for user authentication and authorization.
- Key Components : Login form, JWT implementation, front-end integration.

CRUD Operation with User Management System   Link

- Built a robust user management system with Node.js, Express.js, MongoDB, and EJS. Designed a responsive and user-friendly interface using EJS templates. Enabling dynamic content rendering and seamless user interactions.

Notes App   Link

- Developed a primary chat application with Node.js, Socket.io, HTML, CSS, and JavaScript.
- Provided a lightweight and efficient platform for casual conversations.

File Sharing Web App   Link

- Shared File is a MERN stack-based app that allows users to upload files and generate secure, shareable download links. It provides a seamless and efficient solution for quick file sharing.

Mr. Robot Ai   Link

- Mr. Robot Ai leverages the power of React + Vite for fast and optimized build processes.
- The application showcases a seamless and responsive user interface, providing an intuitive experience for users.
- Key features include real-time data processing, interactive visualizations.

Certificate

React Basics | Meta | Coursera   Nov 2023

- Acquired knowledge of the foundations of React and improved vanilla JavaScript abilities necessary for React development. developed a strong grasp of the React framework to create dynamic, interactive web apps.

MERN Stack Fundamentals | Great Learning   June 2024

- Recalled proficiency with Node.js, Express.js, React, and MongoDB. competent in database management, RESTful API creation, full-stack web application development, and responsive UI design.
